### MESSAGE

It says a lot about the confidence that EEPC has in its members and their products to showcase them in another country, and I am confident that the Indian Engineering Exhibition INDEE in Cairo, Egypt from 23rd to 26th November, 2006 would further strengthen this confidence.

The efforts on the part of EEPC in introducing and popularizing the brand image of Indian engineering products and technology in the world market are, no doubt, laudable. This exhibition is taking place at a time when we are, in a big way, moving towards strengthening our commercial relations with the African countries.

Egypt is one of the potential markets for India in the African region and a major gateway to reach other countries in the north African region. Egypt undoubtedly offers tremendous scope for Indian engineering products and services. INDEE in Cairo, I am sure, will prove to be a turning point in our efforts towards enhancing India's exports of engineering goods to Egypt.

I wish all success to EEPC and the Indian exhibitors in their venture in projecting industrial and technological image of India through the INDEE exhibition organized in Cairo.

KAMAL NATH

### MESSAGE

I am happy to know that the Engineering Export Promotion Council (EEPC) is organizing exhibition of Indian Engineering Products, INDEE in Cairo, Egypt. India's engineering and technological strength has to be projected as India is one of the emerging industrialized nations in the world. This event will give significant push to our exports in the North African region which is an emerging market for engineering and industrial goods.

The INDEE exhibition organized by EEPC has become popular in the overseas markets as it gives Indian exporters and their overseas counterparts an opportunity for extensive interaction to explore business opportunities. Such exhibitions held in the past have demonstrated India's capabilities in terms of supplying quality and technologically advanced products.

I congratulate EEPC and its participants for organizing this exhibition and wish the event a grand success.

### MESSAGE

I congratulate the Engineering Export Promotion Council (EEPC) for organizing the exhibition of engineering products, INDEE in Cairo, Egypt from 23rd to 26th November, 2006, demonstrating the capabilities of the Indian engineering industry. The Council has also organized such exhibitions earlier in other parts of the world, which have met with great success.

Exports of engineering products from India have achieved a growth of nearly 27% in the fiscal 2005-06 amounting to US\$ 20.2 billion over the total engineering exports of US\$ 15.9 billion during 2004-05. The engineering sector has also emerged as the largest contributor to India's total merchandise exports with exports of engineering goods from India having crossed US\$ 5 billion in the first quarter of the current fiscal, representing an increase of 20% over last year. Such exhibitions organized by EEPC have indeed played an important role in achieving such growth, enhancing exports and exploring new markets for Indian products.

I hope that the Council will surpass the export target of US\$ 23 billion set for the year 2006-07 by successfully organizing similar events in other regions of the world, especially in the focus areas.

I wish INDEE Cairo a great success.

(G. K. PILLAI)  
Commerce Secretary  
27.10.2006

## INDEE - CAIRO IN MACTECH '06

AMBASSADOR OF INDIA  
CAIRO, EGYPT

### MESSAGE

It is a matter of considerable satisfaction that over one hundred Indian engineering companies are participating in an Indian Engineering Exhibition, INDEE Cairo 2006 as part of MACTECH 2006 being held at the Cairo Fair Ground from 23-26 November, 2006. The exhibition, which will showcase Indian engineering capabilities in different sectors, is being organized by the Engineering Export Promotion Council (EEPC) of India in conjunction with the organizers of MACTECH 2006. The exhibition will cover a wide spectrum of the Indian engineering industry including industrial plant and equipment, electrical equipment, automotive engine and transmission parts, machine tools and hand tools, medical and scientific equipment and instruments, pumps and motors, packaging machinery and pharmaceutical machinery among others.

India today has a strong industrial base, powered by the third largest pool of trained technical manpower in the world. Its exports find their way increasingly to the most developed countries of the world. A decade and a half of liberalization has released a tremendous response from the Indian private sector and entrepreneurial class, which has made India one of the fastest growing economies in the world in the last few years. Equally important, India's experience in industrial development is perhaps more relevant to developing countries, especially in small and medium enterprises. SMEs are well represented among the Indian companies participating in this exhibition.

Egypt with its unique geographical position and access to convenient shipping routes is increasingly becoming one of the most attractive destinations for Indian goods and investment. With the ongoing economic liberalization and reforms in Egypt, the potential for enhanced cooperation between the two countries has increased considerably. The presence of a number of Indian joint ventures in Egypt, which are doing very well, have set an example for others to follow.

We hope that INDEE Cairo 2006 will provide an exposure to the Egyptian business community of Indian capabilities in the engineering industry, and provide opportunities for meaningful and practical interaction between the business people of the two countries. It is our expectation that as a result of such interaction, the economic and commercial cooperation between the two countries covering trade and investment as well as technology transfer, will be strengthened.

I wish the organizers and participants all success.

Sd/-  
(A. GOPINATHAN)

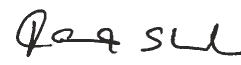

### MESSAGE

Egypt and India, two great nations, two great and ancient cultures, two countries pursuing a goal of becoming pre-eminent in the world. It is at such a great and exciting time that the 13th INDEE is being organized by the Engineering Export Promotion Council in Cairo, Egypt – an exposition designed to showcase India's considerable engineering expertise and its range of sophisticated engineering products and services before Egyptian business enterprises. The INDEE will be a gateway for Egyptian businesses to update themselves on Indian engineering and in turn it will allow Indian engineering exporters to acquire first-hand knowledge and establish contacts in Egyptian markets. Another exposition, MACTECH 2006 being held simultaneously with INDEE will additionally provide opportunity to Exporters-Importers to tap into the potential of Machine Tools, Industrial Tools and Welding & Cutting Equipments.

India and Egypt have enjoyed commercial exchange for centuries and Egypt remains India's one of the important trading partners today. The steady improvement of the Egyptian economy, the rapid growth in FDI and Indian investments, and strong economic and political relationships – are all indicative of more fruitful opportunities for mutual growth.

Egypt has traditionally been one of India's most important trading partners in the African continent. India-Egypt Bilateral Trade Agreement has been in operation since March 1978 and is based on the Most Favoured Nation clause. Egyptian economy is improving with GDP growth at 4.8% in 2005 and for 2006, the growth is projected at 5.0%. FDI in Egypt has also grown significantly exceeding US\$ 1 billion in 2004 and share of foreign trade in GDP has crossed 50%. In 2005-06, India exported engineering items worth US\$ 145.58 million at the growth rate of 53% compared to engineering exports of US\$ 95.37 million in 2004-05. A very cordial relationship exists between India and Egypt both in economic and political spheres with India being a major investor in Egypt.

I wish all Indian and Egyptian participants the very best as they go about forging stronger alliances for a global future.

  
(RAKESH SHAH)  
Chairman, EEPC

### **MESSAGE**

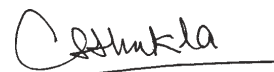

It gives me immense pleasure that our Council is organizing the INDEE exposition in Cairo, Egypt from 23rd to 26th November, 2006. This is the 13th exhibition of the series after successful completion of similar exposition in Kenya, Nigeria, Ethiopia, Venezuela, Brazil, England, Australia, Indonesia, Mexico, Kazakhstan, Egypt and Sri Lanka.

Engineering exports have flourished significantly over a period of time with diversified forward and backward linkages with almost every sector on the national economy. The main objective of holding this exhibition is to project the technological advancement India has made in the engineering sector over the years. India has emerged as a dependable supplier of quality products at competitive price, which has been testified by the fact that nearly 40% engineering products are exported to developed countries and USA is the biggest buyer of Indian engineering goods.

Set up in 1955, the exports from this sector have grown significantly from US\$ 10 million in 1956-57 to US\$ 20.2 billion in the last 50 years and EEPC has indeed played a very important role. This INDEE is being represented by more than 100 Indian firms who will be displaying a wide range of engineering products from different sectors.

I am confident that this event will further strengthen our business ties with Egypt and open up new horizon for the Indian engineering industry in this part of the world in the years to come.

I extend my best wishes to all the Indian exhibitors and visitors from the African countries.

(C. S. SHUKLA)  
Executive Director, EEPC
